

## NOTICE

### **Columbia County Transmission Project Modified 34.5 kV Proposal Summer 2016 Field Work Scheduled**

As you may know, NYSEG is currently planning for the construction of the Columbia County Transmission Project (CCTP) Modified 34.5 kV Proposal. The project will enhance safe, reliable electricity service for approximately 10,000 NYSEG customers by bringing a new source of electricity into the areas of Ghent and Chatham in NYSEG's Mechanicville Division. The CCTP includes construction of a new substation, two 115 kV tap lines to an existing high voltage transmission line and two 34.5 kV feeder lines.

This is to inform you that over the next few months you may see work crews along the proposed right of way conducting field studies to help plan the construction and environmental management of the project.

If you have questions, please call 1.866.717.2202, leave a detailed message and we will be in touch as soon as possible.
